

Dog Name: Damani

Number: 465

Age: 1½ - 2 Years (DoB 7/2010 est.) **Sex:** Male

Coat: Isabella White

Eyes: One Blue, One Parti

Damani is a very laid-back youngster. More mellow than one would expect for his age. He is very affectionate with all the humans he meets - adults and kids. He gets along with just about any dog - male, female, small, medium or large. Damani even ignores cats and large birds - his foster parents have a Macaw.

This boy is not fazed by much and lies around the house most of the day. He may have been an only dog as he does not seem to know how to play with other dogs or toys, but he's starting to pick it up. He came to our rescue very underweight but is showing a good appetite and is starting to put on some holiday pounds.

Damani is young, healthy, neutered, housebroken, microchipped and up to date on all his shots, a veritable clean slate for you to train and bring out his typical Husky affection and loyalty.

Damani is very new to our rescue so additional information will be forthcoming shortly. But – if you want to save yourself the trouble of waiting, and not fall to the back of the line, you should fill out an adoption application at the upper left corner of this page, today!
